EDUCATION

Jain University, Bangalore

Master in Computer Application

Jun 2024 – Sept 2026

GLS University, Ahmedabad

Bachelor's in Computer Application - 84%

Jul 2021 – May 2024

Lions English School, Silvassa

High School, Commerce with Computer Science - 85%

Apr 2019 – May 2021

TECHNICAL SKILLS

- **Languages:** Solidity, Python, Go, SQL, JavaScript, C++
- **Frameworks & Libraries:** Next.js, ethers.js, OpenZeppelin
- **Databases & Tools:** Supabase, Prisma, SQLite, Git, GitHub
- **Security & Audit Tooling:** Foundry (PoC development), Hardhat, Remix

EXPERIENCE

Independent Blockchain & Smart Contract Security Researcher

Jan 2025 – Present

- Completed a private security audit of a Web3 infrastructure protocol under NDA; identified and reported multiple valid vulnerabilities.
- Delivered 18 validated security findings across a broad range of DeFi protocol types, including automated market makers, lending and borrowing markets, ERC-4626 vault architectures, and liquidity management systems.

PERSONAL PROJECTS

Shim - Co-Founder ([Live](#))

May 2026 – Present

- Built and shipped Shim, a production-ready Go security proxy for npm, pnpm, and yarn that intercepts installs, scans dependencies, and blocks risky packages before execution.
- Implemented a daemon scanner with TCP IPC, local vulnerability rules, lifecycle-script analysis, recent-release checks, policy verdicts, and SQLite caching.
- Created cross-platform install/update/uninstall tooling and release builds for Linux, macOS, and Windows.

Account Abstraction - Backend & Integration

Feb 2024 – Mar 2024

- Led the project from design through deployment, enhancing existing crypto wallets with account abstraction.
- Tech Stack: Alchemy, Solidity, Next.js, Prisma, Supabase.

Uniswap V4 Take-Profit Hooks ([GitHub](#))

Dec 2024 – Jan 2025

- Built custom Uniswap V4 hooks implementing automated take-profit order execution, integrating with the V4 core and periphery contract architecture.
- Tech Stack: Solidity, Foundry.

LEADERSHIP & ACHIEVEMENTS

Kuru Smart Contract Security Review

Oct 2025

- Ranked 3rd of 723 participants, with 4 validated findings, in a smart contract security review.

Cyber Shadez Hackathon - Backend Developer

Feb 2024 – Mar 2024

- Led team to 2nd place; built an Account Abstraction DApp using Supabase, Prisma, Alchemy, Next.js, Solidity, and OpenZeppelin.

Cyber Shadez Hackathon - Backend Developer

Feb 2023 – Mar 2023

- Led team to 1st place; built and shipped an NFT minting DApp under competition conditions using OpenZeppelin, ethers.js, and Next.js.
